

PSV Series Diverter & Check Valves

With Hayward Diverter and Check Valves, it's simply a case of 'set & forget'.

Hayward PSV Series 2-way and 3-way Diverter Valves and Check Valves make water flow management simple and maintenance free. Available in both lower cost PVC body and lid construction or durable CPVC body and lid construction that provides greater heat tolerance, preventing warping and leaks in the most demanding environments. All components are made of corrosion resistant materials allowing for proper function over an extended life.

Hayward PSV Diverter & Check Valves

With so many additional features such as spas and waterfalls making up the modern swimming pool, it is essential that the water flow to these features is carefully managed.

Controlling the direction and volume of flow to all parts of the system is the task of the diverter valve. That's why Hayward have made reliability their primary focus in designing their PSV valves. All Hayward PSV Diverter valves are full-flow but have a unique system for customising the level of flow and prohibiting excessive flow.

Just below the handle are three triangular cut-outs. unscrewing the twist knob and removing the handle exposes the white plate inside. This plate has one raised triangle which can be positioned to fit into one of the triangular cut-outs and thereby set limitations on the opening and closing of the valve.

Features and Benefits: PSV Diverter Valves

- Easy-dial index-Indicates the flow setting at a glance
- Easy lock- Handle locks in position by tightening just one knob
- Full-flow ports- for maximum flow rates
- High performance CPVC or PVC construction ensures long life in Domestic or Commercial applications
- Compatible with Hayward (as well as many competitor) valve actuators
- Available in sizes to suit most plumbing with 40/50mm as well as 50/65mm models

Features and Benefits: Check Valves

- Clear cover for visual inspection at a glance
- Full-flow ports- for maximum flow rates
- High performance CPVC or PVC construction provides options to ensure long life in Domestic and Commercial applications
- Available in sizes to suit most plumbing with 40/50mm as well as 50/65mm models

Hayward GVA-24 Valve Actuator

The Hayward Valve Actuator rotates 2-port and 3-port valves automatically. It is designed to the industry standard configuration operating a 24-volt switching power supply so the GVA-24 is compatible with all major manufacturer's valves and pool automation systems.

	Body Colour	Material	Internal Pipe Size	External Pipe Size	Height	Width	Depth	Flow Rate (Ltrs/ Minute)
Two Way Valves								
1G-PSV2S	Black	CPVC	40mm	50mm	15mm	16.5mm	12mm	283
1G-PSV2S2	Black	CPVC	50mm	65mm	15mm	16.5mm	12mm	473
1G-PSV2SDGR	Grey	PVC	40mm	50mm	15mm	16.5mm	12mm	283
1G-PSV2S2DGR	Grey	PVC	50mm	65mm	15mm	16.5mm	12mm	473
Three-Way Valves								
1G-PSV3S	Black	CPVC	40mm	50mm	15mm	16.5mm	14mm	283
1G-PSV3S2	Black	CPVC	50mm	65mm	15mm	16.5mm	14mm	473
1G-PSV3SDGR	Grey	PVC	40mm	50mm	15mm	16.5mm	14mm	283
1G-PSV3S2DGR	Grey	PVC	50mm	65mm	15mm	16.5mm	14mm	473
