

# QuikSkim™

The QuikSkim Venturi Skimmer is the future of swimming pool design with its unique combination of true energy efficiency, advanced safety features and simplistic style.

- ✓ Unrivalled energy efficiency
- ✓ Superior safety features
- ✓ Innovative design
- ✓ Improves circulation
- ✓ Enhances surface skimming
- ✓ Saves \$\$\$

# Unrivalled energy efficiency

## How does it work?

The QuikSkim's powerful skimming action is energy efficient because it doesn't require pump suction. Just 30 litres of return water is pushed through the QuikSkim's venturi fitting to generate more than 200 litres per minute of powerful skimming. This unique technology provides more effective and efficient circulation because full pump suction can be drawn from the floor only.

## Safety

There is no risk of entrapment because the QuikSkim features a specially engineered anti-entrapment vacuum break and is powered by a venturi instead of pump suction.

## Style

The QuikSkim is available as a white, grey or black skimmer so you can fully express your personal style in the design of your pool.
