

## EFFORTLESS DEPENDABLE LEVELLING

A great value option that keeps your pool filled at all times.

- Reliably maintains pool water level
- Adjustable water height settings
- Protects pool pump & equipment
- Suits concrete & fibreglass pools
- Saves time & prevents overfilling

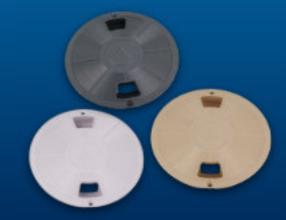

Your pool will lose water through evaporation and splashing.

Just set the correct height for skimmer and pump operation and the QuikLevel will keep your pool topped-up day-in and day-out. Manually filling your pool is a frustrating and time-consuming chore. Install a QuikLevel on your new pool and you'll never have to get the hose out.

Three stylish neutral colours to choose from for a finish that blends effortlessly with your deck area.
