**INSIST ON SPA KING FOR GUARANTEED PERFORMANCE AND DURABILITY**

**Ingenuity and determination ...**

*"has given the answer to building a better Loop Charged Injected Spa Blower"*

**GENERAL DETAILS**

Spa King is a totally new Innovation in Spa Blowers, surpassing all others in power and quietness of operation under full load conditions.

It is designed to do away with the problems that have traditionally plagued conventional Spa Blower Motors, such as overheating, burn-out, corrosion and short operational life.

Spa King has separated airflows so that motor cooling operates independently of the aerifying airflow delivered to the Spa water. This completely eliminates expensive overheating problems caused by start up air supply line resistance, or tub airhole sizes or distance to equipment.

Design operating temperature are maintained in the motor at all times, clean fresh air is delivered to the tub. Corrosion due to chlorine - laden vapour reaching the motor is eliminated, and specially developed plastic mouldings, foam divisions and injection moulded cover protect the unit and reduce noise.

Spa King are also used on commercial installations and found to have a capacity well in excess of the blowers normal domestic requirements by supplying solid performance and value for money.

**TECHNICAL DETAILS**

Spa King Blowers manufacture a range of Blowers from 1HP to 1.5 HP in 240 volt 50 H<sup>z</sup>, 120 volt 60H<sup>z</sup>, 220 volt 60H<sup>z</sup>.

All parts, subject to corrosion are made of plastic, and the unit is power authority approved with G.F.C.I. Protected circuit CA. (USA) Earth Leakage with quality one way valve preferred.

When installed in pool equipment rooms it is recommended that a 5cm by 30cm air vent should be provided at the bottom of the door with a 2cm x 30 cm vent at the top. This will provide air circulation of benefit to Spa King Blowers and to other pool equipment.

Spa King carries a full 12 month warranty and is covered by one or more of the following patents.

**PATENTED** • AUS 599909 USA 4762472 NZ 217920

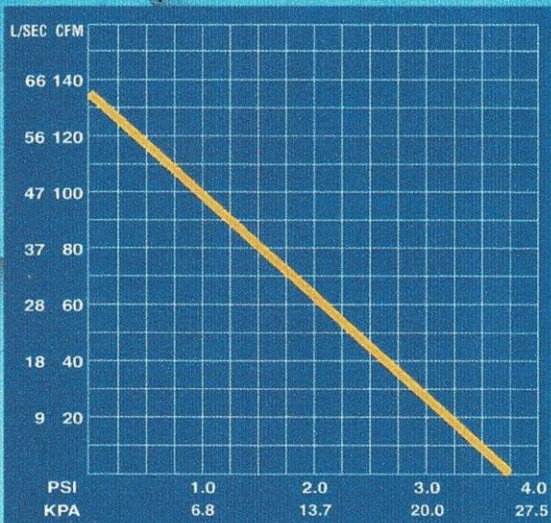

**REGISTERED DESIGN** • AUS 95727 USA D29 6698 CAN 58727 UK 2001459 NZ 20808

**Trade Mark Spa King** • Australia • New Zealand • France • USA

**Trade Mark** "...Loop Charged Injected" Australia.

**The only Blower designed especially for light Commercial Domestic Spas and the Service Industry**
